

Environmental Policy

ECS is an international environmental technology provider that renders services for decontaminating organic pollutants, generating biogas, and controlling vegetation. The company provides engineering, consultancy, and project design services, as well as advanced processing equipment, helping our partners manage the execution of environmental protection in line with global best practices in this field.

The company adopts this Environmental Policy, considering hazards and risks in the relevant industries and their environmental impact and realizing its responsibilities and liability towards the community, partners, employees, and shareholders. The company considers this Policy as a primary element of efficient performance management.

The company's core principle is its sustainable, cost-effective, and environmentally friendly development, characterized by the minimization of its operation's negative environmental and socio-economic impacts. The company promotes the use of environmentally friendly technologies and practices with continuous research to improve the company's environmental performance. Following the sustainable development strategy as an overriding priority and an integral part of the activities both in the short & long-term perspective, the company strictly complies with all environmental requirements and initiates the development and application of new technologies, innovative products, and services.

To achieve the set goal, the company undertakes the following commitments:

- Strictly comply with the requirements of the national environmental legislation of the countries in which we operate, with international standards and best world practices while carrying out our activities.
- Consider the best available technologies and implementation when carrying out the work.
- Ensure the reduction and prevention of negatively impacting the environment.
- Ensure energy efficiency and decrease carbon footprint.
- Train employees on environmental regulations and best practices and encourage employee participation in environmental initiatives.
- Introduce appropriate management practices towards contractors and business partners to ensure compliance with the policy requirements during the execution of the work at the company's sites or on the company's behalf.
- Regularly review and update this Policy to reflect changes in environmental regulations, technologies, and best practices and communicate any policy changes to employees and stakeholders.
